## Product Transfer Shuttle

- Sanitary stainless steel construction meets USDA and AMI standards.
- Optional USDA-Dairy design and construction meets the highest sanitary standards.
- Use with intermittent motion packaging machines, including horizontal thermoformers and tray, cup and cartoning lines.
- Speeds to 18 cycles/minute, depending on product characteristics, target weights, pocket size and configuration.
- Options to accept change parts for additional pocket sizes and configurations.
- Servo motor, stepper motor, or pneumatic drives.
- Self-draining surfaces simplify cleaning and prevent product accumulations.
- No-tools removal of product contact parts and assemblies.
- Lift-off covers with safety interlocks.
- Support options include floor stands, hangers from an overhead structure, or cantilevered stands on casters.
