

AccuFlavorTM seasoning tumble drum

HEAT AND CONTROL[®]

Two-stage design improves seasoning coverage, adhesion, and application rates.

Stage 1
Synchronized seasoning
for tighter application rates

Stage 2
Increased product
dwell time

AccuFlavor's two-stage shape combines synchronized seasoning application with prolonged product-to-seasoning exposure for uniform coverage using less seasoning.

AccuFlavor offers major benefits over ordinary cylindrical drums

- Reduced seasoning usage
- Less seasoning fall-off
- Doubles product dwell time
- Conveys without tumbling when seasoning application is not required

AccuFlavor Advantages:

- Doubles product dwell time compared to cylindrical drums
- Consistent seasoning coverage even during variations in throughput
- Product throughput is controlled by FastBack feed conveyor, not gravity
- Remove drum for cleaning without tools
- Available only on FastBack conveyors
- Patents pending
