

# With Ishida **salad weighing** is hands-free

Eliminate the need for a full-time operator to manually distribute salad to each radial feeder. Ishida does it automatically with the patented Rotary Sweeper™.

Accurate and sanitary salad weighing is a hands-free operation with Ishida Big Bucket Salad Weighers. Automatic rotary sweeping fingers and vibratory action evenly distribute wet spinach, spring mix, and other leafy greens to each radial feeder without sticking or clogging.

## **Ishida Model CCW-RV-214W-1S/70-WP with Rotary Sweeper option**

- 35° sloped vibratory dispersion table with cone and rotary sweeping fingers
- Use the weigher touch screen to program and adjust:
  - Finger rotation direction, speed, duration and stop time
  - Two IP67 ultrasonic sensors which control product feed
- 10° sloped vibratory radial feeder troughs
- 60° sloped discharge chutes
- C4 embossed product contact surfaces
- IP69K waterproof with sloped self-draining surfaces
- Large 5 or 7 liter hoppers
- Infeed camera

# New or Retrofit: Rotary Sweeper™ System improves salad weighing efficiency.

Ishida offers the Rotary Sweeper dispersion feeder system as a retrofit package and as an option on new weighers, both for the following models:

**CCW-RV-214W-1S/70-WP**

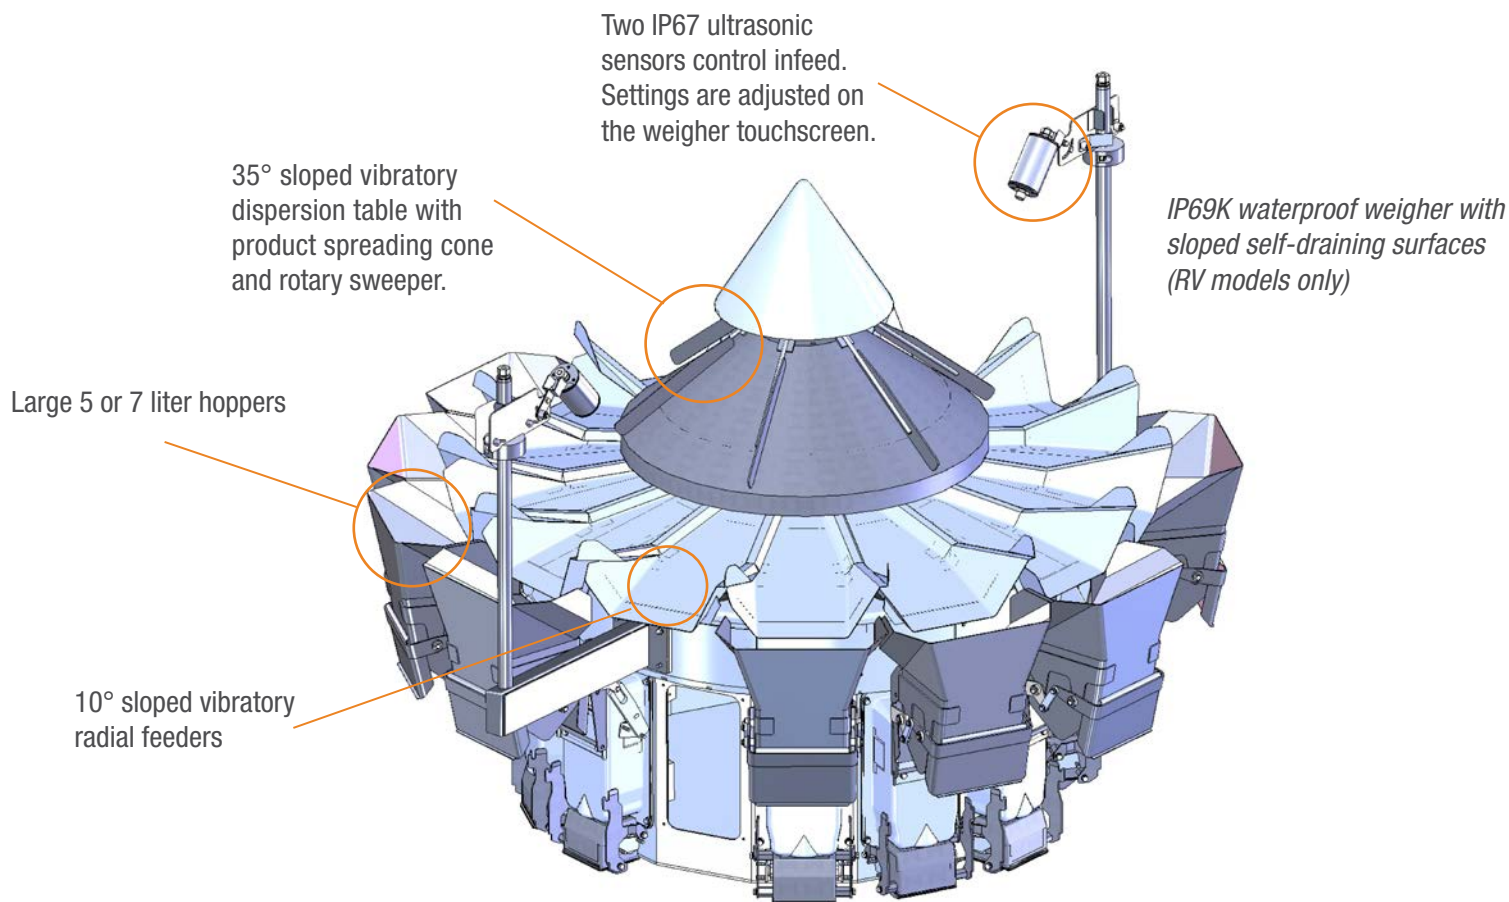

**CCW-RV-214W-1S/50-WP**

**CCW-RV-214B-1D/50-WP**

**CCW-R-214W-1S/70-WP**

**CCW-R-214W-1S/50-WP**

**CCW-R-214B-1D/50-WP**

**Applications assistance, installation, service, parts and training are always available.**

**Contact Heat and Control to improve the performance of your Ishida salad weigher today.**
