

KNOWLEDGE IS A POWER

packaging

“Even if you’re on the right track, you’ll get run over if you just sit there.” - Will Rogers

Training is a sure-fire way to build your business. Knowledge is power, and teaching employees how to do their jobs better can have a powerful effect on profits and productivity.

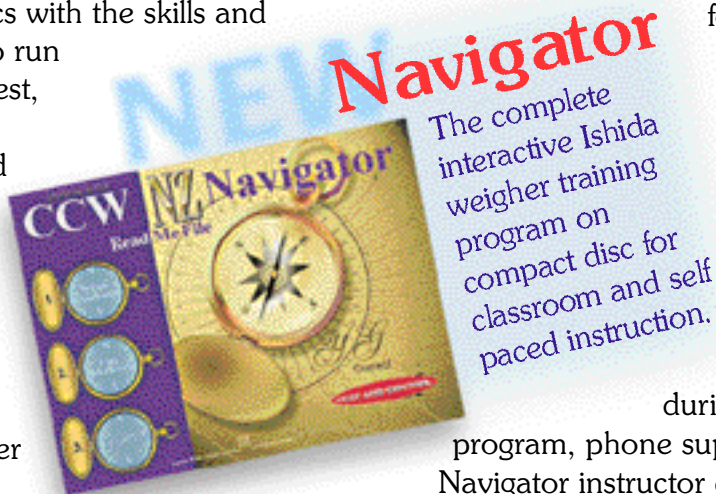

Heat and Control training empowers machine operators and mechanics with the skills and confidence they need to run your equipment at its best, maximizing production, reducing downtime, and streamlining cleaning and maintenance procedures.

New Packaging Training Tool!

Set your course to higher productivity on your packaging line with our new training program for Ishida weighers... Navigator! This unique interactive learning package is easy to use, and will be an effective tool and resource for years to come.

With the complete Navigator training package, up to six persons participate in three days of intensive operator and maintenance training at

Heat and Control’s Training Center. Our instructor provides hands-on technical training, plus you’ll receive one copy of the Navigator Operator and Maintenance Training CD for the group. We also provide one Ishida Weigher Operation & Service Manual for each participant.

If you prefer to learn at your own pace without leaving your facility, we can supply you with the complete Navigator Operator and Maintenance Training CD, or just the Operator level of the CD.

If you need any assistance during your on-site training program, phone support from an experienced Navigator instructor can be purchased in 4-hour increments.

Whichever plan you choose, Heat and Control training programs will help you get the most out of your Ishida weigher by using the special techniques and expertise we’ve developed since introducing Ishida weighers to North America over 20 years ago.
