

Cereal Packaging Solutions

You might know us best for Ishida multihead weighers. Heat and Control has more experience weighing cereal than any other company. We know how to solve the difficult sanitation and production issues that are unique to cereal. In fact, we offer the same expertise for product handling systems, including FastBack® horizontal motion conveyors, Varilift™ "No Spill" bucket conveyors, complete line control systems, dust enclosures, and multi-position fillers.

For packaging machinery backed by experience and the industry's best parts, service and training team, count on Heat and Control!

FastBack

Horizontal Motion Conveyors

- Reduce product breakage and dust
- Cut cleaning costs
- Preserve pre-mixed blends
- Instant stop-start motion for more accurate feed to weighers
- Quieter operation
- Rapid Deployment systems for faster installations

VARILIFT

Bucket Conveyors

- Always upright buckets eliminate spills
- Discharge from any point under horizontal run
- Multiple product infeed points
- S, C or horizontal configurations
- Safe, anti-rollback operation
- Quick release buckets for easy cleaning

ISHIDA

Weighers & Checkweighers

- Unbeatable weighing accuracy
- Highest production efficiency
- Gentle product handling
- Easy operation
- Fast changeovers
- Simple cleaning
- Durable
- Low maintenance

HEAT AND CONTROL

Technical Support

- Readily available parts
- Reliable parts repair
- Knowledgeable field service
- In-plant & classroom training programs
- Equipment demos
- Custom engineering

Superior Cereal Packaging Systems

Cereal packaging systems from Heat and Control protect the high quality of your product and generate greater profits by reducing operating costs and increasing productivity!

FastBack® Conveyors

Gentle horizontal motion distribution and scale cross feed conveyors prevent product breakage and coating loss, and maintain the blend of pre-mixed cereals during delivery to the packaging line. FastBacks are durable, low maintenance, and easy to clean.

Varilift™ Bucket Conveyors

Non-spill buckets prevent product loss, and are easily removable to simplify cleaning procedures. Optional multiple infeed and discharge points allow Varilift conveyors to accept and deliver product to more than one location!

Ishida Millennium™ Weighers

Unbeatable accuracy, ease of operation and cleaning, and the unmatched technical support and engineering services of the Heat and Control/Ishida team make Millennium™ weighers the ideal multihead weigher for cereal packaging.

Training Programs

Heat and Control training programs empower operators and mechanics with the knowledge they need to maximize the productivity of your packaging line. The unique interactive CD that's included in our Navigator Training Program is used in both off-site or in-plant classrooms to teach skills that will reduce downtime and streamline maintenance and cleaning procedures.
