

# Uphill horizontal motion conveying

ClimbBack is the ideal sanitary incline conveyor for processing, accumulation, and dry area packaging!

## **ClimbBack is the only horizontal motion conveyor that elevates product!**

Get the benefits of gentle, sanitary, quiet horizontal motion conveying without the high cleaning costs of belt conveyors or product damage caused by vibratory conveying.

- **Convey up 8-degree inclines** ClimbBack is the simple, space-saving solution for accommodating different packaging machine heights, recirculating accumulation, and gaining height in tight equipment layouts.
- **Sanitary product elevation** ClimbBack's one-piece stainless steel pan is easy to clean. It stays clean with most products, eliminating loss of coatings, build-ups in the pan, and unplanned cleaning downtime.
- **Quiet conveying** Low-70 dba conveying with product reduces workplace noise levels.
- **5-year drive train warranty** Proven reliable in thousands of installations, ClimbBack's FastBack drives require no preventative maintenance!
- **Contact us for a ClimbBack demonstration!** Toll-free at 800 227 5980, [info@heatandcontrol.com](mailto:info@heatandcontrol.com), or [www.heatandcontrol.com](http://www.heatandcontrol.com).
