

FastBack®

Excaliber™

Cut the waste of seasoning distribution with the clog-free Excaliber dispenser!

- Uniform dispersion of salt and seasonings
- Seasoning feed matches product flow
- Reduce seasoning waste
- No clogging or seasoning build-up
- Quick-release feeder – no tools needed

Multiple Patents Pending

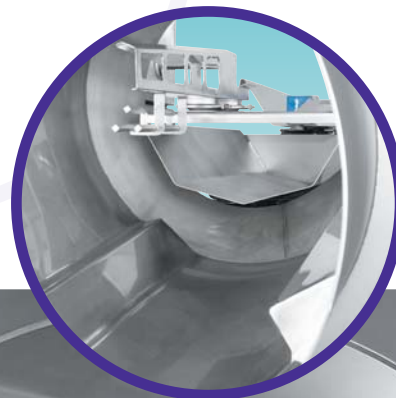

Without clogging or constant adjustment, FastBack® *Advanced Area Control Technology* with the Excaliber seasoning dispenser delivers a controlled, even curtain of seasoning into a drum applicator...and automatically adjusts its feed rate to match changes in product flow.

Excaliber mounts to the FastBack infeed conveyor with two ring clamps so it can be easily removed by hand. Simply wipe its electro-polished surface clean and clamp Excaliber back in place.

Flex-Wall Seasoning Feeder features external agitation paddles to prevent bridging and seasoning degradation. Removable liner and auger speed changeovers.

One-piece flights in drum improve seasoning exposure and reduce breakage.

Ring clamps let you remove the Excaliber dispenser without tools.
