## FastBack Sizing & Separating Conveyor

*Sizing/separating systems are available with a variety of perforated drums, chutes and transfer conveyors for separated product.*

### Continuously convey and sort by size, remove fines, grade or scalp.

FastBack provides simple, space-saving sorting and fines separation for snacks, frozen foods, cereal, candy, nuts and many other products.

---

Gentle tumbling thoroughly separates product pieces. Easily interchangeable drums are available with openings suited for fines removal or a variety of sizing operations.

Use the same FastBack drive for different operations and pan sizes. Blending and seasoning components can also be used to increase versatility.

---

Proven reliable in hundreds of installations, FastBack conveyors require no preventative maintenance or pneumatic components.

Slow-forward fast-back conveying motion dramatically reduces product breakage. Coatings do not build up in the conveyor pan, eliminating unscheduled cleaning downtime and unnecessary sanitation costs.

# FastBack Sizing & Separating Conveyor | Model FSS

Reliable FastBack horizontal motion conveyors give you every advantage for simple, efficient product handling.

- Quiet operation
- Fast product transfer rates
- No pan cracking or flexure tuning
- No preventative maintenance
- Reduce product breakage and coating loss
- Minimal cleaning requirements
- Programmable speed
- Instant stop/start
- Available with Revolution seasoning applicator, Rapid Deployment support platform, CEIA metal detector, Ishida weigher, snack bagmaker, checkweigher and X-ray inspection

Constant improvement and engineering innovations mean these specifications may change without notice.

*Protected by patents granted and pending.*

*Interchangeable drums are available with openings to suit many applications.*
