

Fastest Tube Nut Packaging from Ishida!

Ishida's Atlas-ITPS packaging system for tube nuts nearly **doubles the production speeds** of other machinery for this application.

The specially engineered system integrates an Ishida CCW-R weigher and Atlas-202 bagmaker, and features patented technologies that insure the highest possible accuracy and operating efficiency.

- Delivers unbeatable performance at up to 120 bags/minute.
- Total control of the weigher and bagmaker from one touch screen panel makes changeovers quick and easy, and minimizes operator training time and cost.
- Direct mounting of the scale to the bagmaker eliminates support framework, reduces installation costs, and saves valuable floor space.
- Exclusive weight calculation technology delivers near zero product giveaway.
- Programmable seal times and precise film registration produce high quality bags.
- Gas flush and heated hole punch complete the tube package.
- System retains flexibility to run different bag sizes for other products.

This new Ishida Atlas-ITPS system delivers the innovative solutions nut processors have been looking for to achieve superior high-speed tube nut packaging.
