

ITM Information That Matters™ Manufacturing Information Platform

ITM delivers your production line's most important metrics in real-time via mobile phone, laptop or desktop computer using a simple user interface.

- **Key Performance Indicators (KPIs)** Monitor the critical control points to determine how well your line is running and where to make adjustments to increase performance and efficiency.
- **Overall Equipment Effectiveness (OEE)** See clear indications of how your performance measures up against industry benchmarks.
- **Real-time notification of faults** Improve maintenance efficiency by providing knowledge of problems before technicians arrive at the machine.

Knowledge at your fingertips
User-friendly interactive ITM interface is accessible on your smart phone or computer from remote locations.

Process, Package, Prosper!

Get the right information to the right people at the right time with Information That Matters!

- Raw process data is harvested from the controllers on your processing, product handling, and packaging equipment and fed to the **ITM** server.
- The **ITM** server processes the data, filtering down to the control points which are critical to your specific operation.
- **ITM** then presents the formatted data to you on a Visual KPI webpage. View your customizable **ITM** webpage on any computer with a standard Internet browser or on your smart phone from remote locations.

Select the ITM package that best meets your needs.

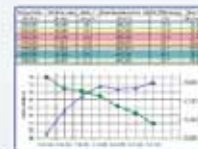

"I just need to get data out of my equipment."

ITM Dashboard™ Performance graphics on Web displays
 OPC tag set
 SCADA system compatible

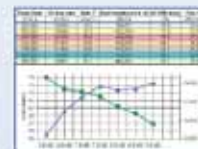

"I need to analyze my line information."

ITM Report™ ITM Dashboard functions
 SQL tables
 Production reports
 MES and ERP integration enabled

"I need a smarter way to monitor my line."

ITM Mobile™ ITM Report functions
 Organized KPIs
 Smart phone display
 Email and text notification
