FastBack horizontal motion conveyors minimize product damage and improve delivery

Always At Your Service

Technical support

Convenient access to regional sales and service centers assures our customers get quick and accurate responses to technical and spare parts inquiries. Our reputation for excellent customer service is unmatched in the food industry.

Custom engineering

We offer innovative solutions to today's challenges of higher speeds, greater efficiencies, and lower operating costs. For that unique product or plant layout, we can supply custom-built equipment to your exact requirements.

Training

Heat and Control understands the importance of after-installation training for your operators and maintenance personnel. Classroom and on-site classes teach how to run our equipment safely and at its highest level of efficiency.

Each job is closely monitored by a project manager to ensure correct specifications and on-time delivery.

Equipment demonstrations

Test your products, evaluate our equipment under simulated production conditions, and discuss your project with experienced applications engineers who understand your objectives.

Worldwide service

From over 30 offices and manufacturing plants around the world, Heat and Control supports you with spare parts, service, technical assistance and operator training.
