

WASHRACKS

Simplify Ishida Weigher Cleanups!

A Heat and Control washrack for your Ishida weigher's hoppers, troughs, dispersion table and discharge chutes can simplify cleaning procedures and reduce cleaning time and costs.

- Product contact parts mount easily for thorough and centralized sanitation.
- Casters provide portability for convenient transfer of the washrack to the cleaning area.
- Parts drain quickly, including the hoppers which mount with their doors in the open position.
- Durable, stainless steel construction.
- Washracks are also available as a built-in fixture of weigher support platforms in washdown areas.

Washrack holds hopper doors open for easy cleaning and complete draining.
