Rotary Brander

Continuously brand grill marks on meats, poultry, seafoods and vegetables for an appetizing finish.

Brand top, bottom or both sides
Choose from single and two-sided branders for formed and naturally shaped products.

Custom markings
Diamond patterns and other custom markings can be ordered instead of standard parallel grill marks.

Easily adjustable
Quickly set branding height for different products. If branding is not required, the grill roll can be raised clear of the product.

Floating ring roll
This option uniformly brands chicken, shrimp, vegetables and other products of irregular thickness.

Control branding color
Adjust branding depth and speed to suit product requirements.

Built to USDA standards

From products coatings and cooking, through freezing and packaging, Heat and Control supplies the complete system.
