Mastermatic® Roll Salter

◀ *Roll Salters fit most conveyors and can be equipped with an optional automatic salt feeder and dust extraction system, as shown.*

Multi-point adjustments ensure a uniform flow of salt across the application roll and product.

Accurately apply salt to chips, nuts, & other product packs up to 78" wide

Precise salting

A precision-machined dispensing roll deposits salt evenly over products passing beneath it on your fryer salting or transfer conveyor.

Fully adjustable

Multi-point adjustments on the salt dispensing hopper ensure a uniform flow across the entire roll. Simply adjust the roll height to apply different grades of salt. A variable speed drive controls the roll speed for different application rates and its digital display allows operators to quickly repeat application rates for different products.

Compact size

Easily mount the Roll Salter over new or existing conveyors up to 78" wide. Compact design allows convenient manual filling or use with automatic salt feeders.

Easy cleaning

Rugged stainless steel construction with few moving parts provides quick cleanups and reliable, low maintenance operation.

Mastermatic® Roll Salter | Model RSX

Ideal for high capacity applications, salt is consistently applied for superior product quality with minimal waste.

Salt flows evenly from the V-shaped hopper without sticking or bridging.

Roll Salter Standard Models			
Model	RS34X	RS42X	RS78X
A	34"	43"	78"
Salting Width	86cm	109cm	198cm
B	38.5"	46.5"	82.5"
Overall Width	98cm	118cm	210cm

Dimensions are rounded to the nearest inch/centimeter.
Additional sizes are available to fit your conveyor.

Constant improvement and engineering innovations mean these specifications may change without notice.
